

# Build Like a Bear

Bears build dens in tight spaces. Try building your own “den” with a box.

## WHAT BEARS USE

Small, open area in rocks or under a tree

Their claws

Leaves and twigs

## WHAT YOU NEED

Large box, about 3 ft. x 3 ft. (1m x 1m)

Packing tape

Scissors

Blankets and pillows

## WHAT YOU DO

1. Use packing tape to seal the box so it won't open.
2. Cut a hole in the side of the box. The hole should begin at the floor and be big enough to crawl through.
3. Put blankets and pillows inside to make a cozy bed.
4. Crawl into your den for a long winter's nap!
